Italtrike Philosophy

To ride your own tricycle is an important experience for a kid. To be able to do it at school and at home represent a learning and growing moment.

Since 1983, we conceive and produce tricycles, and we have gathered during all these years a unique experience and knowledge, always at the service of our best clients : Children.

We are known all around the world through our quality projects and our exclusive design for schools and families.

Italtrike is the leader for the production of tricycle for kindergarten and communities with

a complete range of models for every age and needs.

“Kids on Wheels” is our slogan, which means that physical exercise and sport remains always the most healthy and fun activity you can offer to children.

Our tricycles are conceived and built respecting the fundamental of the European, Americans and Asian security rules.

We have also succeeded to maintain most part of our production in Italy and we will continue of doing it dedicating the same passion on this wonderful product.

Our design, Our passion

Design, engineering and children development skills are the foundation of Italtrike. To develop our products, for schools and for home as well, we work with child specialists like teachers or pediatricians.

Since more than 20 years now we work with the designer Alain Pineau that has been a part of almost all our products.

Designing a range of tricycles for children gardens doesn't allow any mistake about safety and quality, but it needs also to know and to understand a lot about children physical and cognitive development.

When we develop tricycle for special need kids, we always do it with the support of medical specialists, and therefore all our products benefits all these experiences.

We invest a lot of resources to bring the best to kids, from innovations, news materials and concepts.

Italtrike now is famous for the quality of its design , but, beyond the love of the «Grande Opera» («great work» in Italian)

Our mission is really to provide children with their first trips to freedom, to encourage them to move and develop their capabilities, motor skills and independence, to «learn to do alone» as Maria Montessori used to say.

Our Sustainability

Sustainability for us is thinking about our future and the one of our children. Sustainability and respect for the environment have always been part of our identity.

We firmly believe that there is no development or progress without care and love.

It is with passion that every day we take every decision, both big and small, according to these values: to create a design and a production system that is careful and respectful. Since 2010 our company has been certified according to international standards on Environment (ISO 14001:2015), Health and Safety of workers (ISO 45001:2018). We always look out for innovative and sustainable materials, for productions processes that do not impact on the health and safety of our workers.

We produce all our products in Italy according to the circular economy concept.

We are committed to reducing our carbon footprint so to give our small users a better future.

Find out in detail the pillars of the **"Italtrike Sustainability Programme"**, which aims to bring us to zero emissions by 2030.

Discover more about it →

Local Production

95% of our components come from suppliers located less than 70km from Italtrike headquarters.

Italtrike Forest

We planted 500 trees in Guatemala in 2021 with our friends from ZERO CO2 to offset CO2 emission and support locals campesinos, And We will continue to do so.

Recycled and bio-based Materials

In addition to reducing the use of single-use plastics, we are increasing the use of recycled plastics, as we first did with "la cosa". Furthermore we are introducing bio-based plastics from wood and from cork.

Built to last

We provide replacement parts for almost all of our products, to expand their lifetime.

Product Design

We design our products to minimize their environment impact at every stage of their life cycle.

Life Cycle Assessment

We have carried out our Life Cycle Assessment with a spin-off of the University of Siena, to be constantly aware of our impact on the planet, keeping it monitored as a KPI of our target to be carbon neutral in 2030.

Renewable energy

2018 to 2020: installation of solar panels on our HQ to power production and offices.

Product Carbon Wheelprint

From 2022 we will introduce an ID Card for our products, with informations about their CO2 emissions.

Our Bravo Box packaging

We reduced our utilization of single-use plastic in our packaging by 95%. It is now made of 100% recycled and recyclable paper fiber.

Our Credits

Italtrike® has been manufacturing its school tricycles lines in Italy since the beginning. Italtrike is proud of it, of its workers and their capability and the way every day they work for the love of it. There are things that can be done only with the passion and experience gained during years of work.

In 1999 **Italtrike**® has certified its production with the standards ISO 9001 and keep on updating its quality based on the next issues to confirm that Quality is one of the first aspect controlled by the company. In 2010 Italtrike has implemented by getting the ISO 45001 Safety standards of the work place for its workers. The same year Italtrike achieved the ISO 14001 about the manufacturing process and the environmental standards. As result of that certification, Italtrike it is a factory where products are made following high quality standards, providing the maximum safety standards for its workers a dutiful environment respect.

Italtrike® gives true five years warranty on frames and forks of its tricycles. Italtrike gives also a complete range of spare parts. You can buy spares and keep your tricycle on the road for years and years. Always buy original Italtrike spare parts and keep tricycles going forever.

All **Italtrike**® tricycles and products are designed and manufactured in complete respect of the latest European and US rules in terms of Toys safety standards.

Italtrike® is Member of the Italian Toys Association.

Italtrike® has the licence ,on a certain number of products, to export to Mainland China.

GCC - Gulf Cooperation Council.

Italtrike® has been cooperating with the French Designer Alain Pineau since 1988. Alain Pineau has been able to make Italtrike's trikes to stand out in the worldwide markets thanks to the emotions and originality they transmit.

PRODUCTION CODE and Warranty terms

All Italtrike products have a Production code label.

On the label is marked a five digit code PXXXXX

By this code, Italtrike can trace the production date and its components. The new EU standards prescribes that products must have a traciability code. Italtrike has been using this system since 2005. Warranty on Italtrike products can be activated by sending the Production Code to Italtrike's quality departments together with the replacements part request.

Each replacement part is listed in this catalogue and on each assembling manual included in the tricycle box.

What teachers say...

"Eco friendly tricycles helps promote clean living for kids in the future, as well as to help market our school to new families who know we are consistently bettering ourselves for the future."

Cathy A. Preschool teacher

"Development for the toddlers seems that they are perfectly right size and right height."

Sharon A, Preschool Teacher

"Sturdy product, especially for those learning to ride for the first time. Great means for getting around the school and playing in the environment."

California Preschool teacher

Eolo

Sustainability and Design

A school tricycle range, sustainably designed. Eolo is the new range from Italtrike.

A sturdy and solid structure that let children ride in safety in the playground.

For more than 30 years, Italtrike has been at the forefront of innovation and design, creating new technical and environmentally friendly solutions to clients all over the world.

Eolo represents an innovative approach in design, that is aesthetically pleasing and inviting to all children.

People are in the heart of everything we do and everything we produce. These same values drive our approach to sustainability. We believe we can deliver meaningful, lasting economic, environmental and social change through the choice we made and the behaviours that we demonstrate.

We have reduced energy consumption in our factory, we have completely revised the manufacturing process, re-organised packaging and logistic, and we have conceived the product's life cycle to its end.

"Eolo" TM represents an innovative approach in design, that is aesthetically pleasing and inviting to all children. Within Eolo we have placed a special attention on sustainability and green economy during the design stage.

By collaborating with Alain Pineau, his designers and engineering team, through a partnership of more than 20 years, we have actualised a product that moves as free as the wind.

Stefano Gandolfi
President

Developed for use by pre-school children, the eolo line of Tricycles and other wheeled vehicles is based on the concept of sustainability and the circular economy.

The various components making up the product are in fact assembled to each other cold and are therefore easily disassembled at the end of the life cycle to then be reinserted in a recycling phase and a new production use.

The process therefore completely eliminates any type of processing that pollutes the environment and that is detrimental to the health and safety of workers, such as welding and powder coating.

At the same time, by making the packaging volumes more compact, transport logistic are radically reduced and in addition all the various component suppliers are close to the final production site.

We create Sustainable tricycles through a lifecycle of commitments

A better Life Cycle: meaning less energy used during the manufacturing process and easy repurposing.
A selection of materials that are durables, reusable and recyclable with a lifelong quality performance and upgrade opportunities.
Improving: materials, production, transport, use and end of life.

Materials

A selection of durable, reusable and recyclable materials.

The Green Economy

100% Recyclable and detachable materials.
Easy to dispose of at the end of the product life.

Production

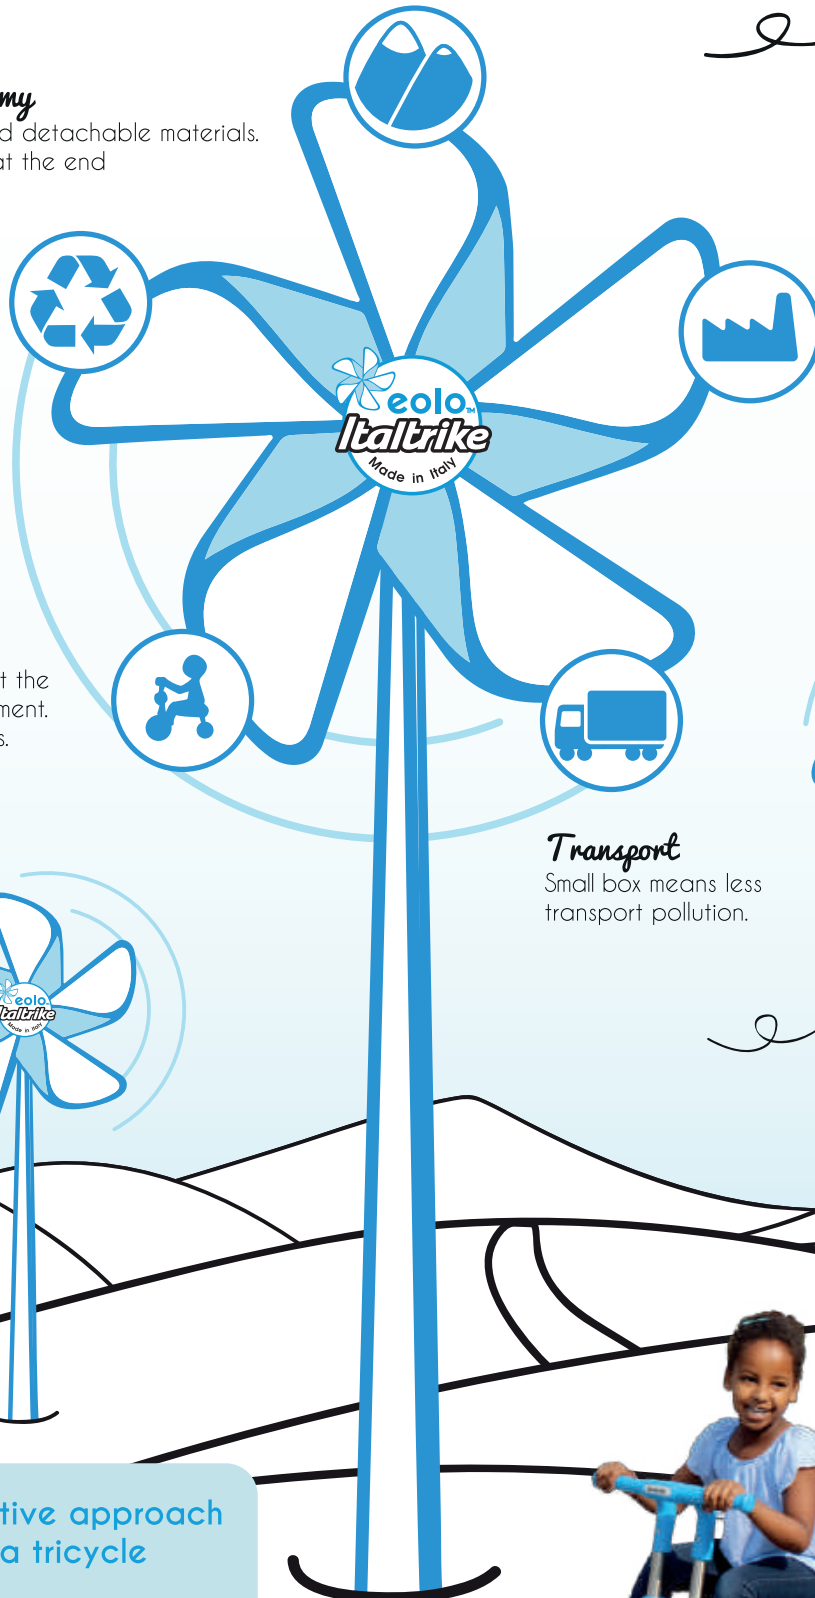

Low Carbon Footprint.
100% Made in Italy

Playtime

Change the size to fit the growth and development.
Available Spare parts.

Transport

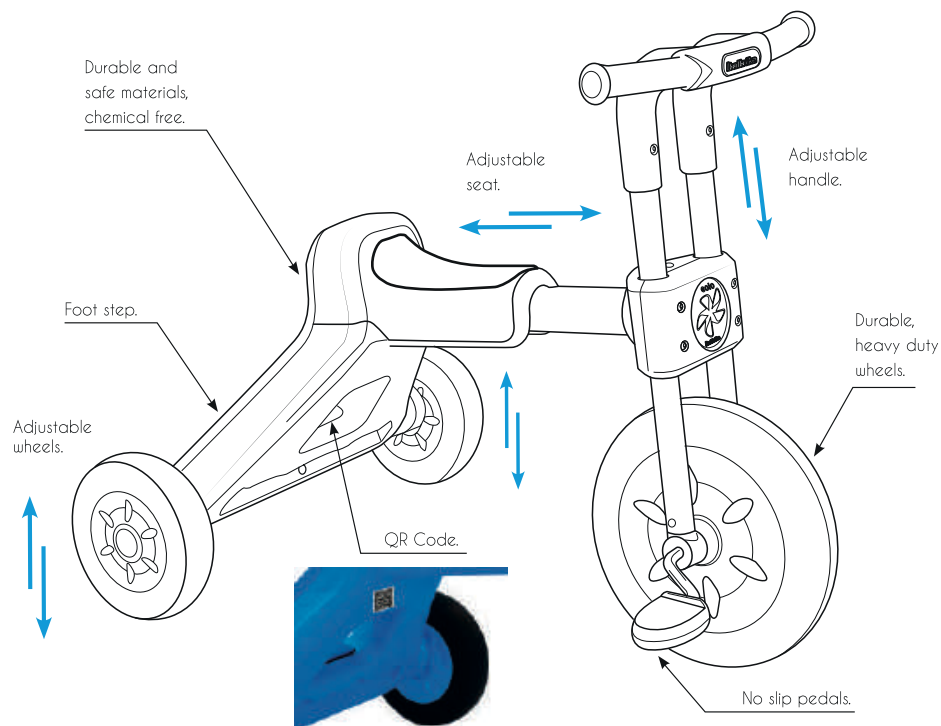

Small box means less transport pollution.

eolo, the innovative approach in the design of a tricycle

not only aesthetic lines, colours and shapes but a specific attention at sustainability values during the design phases.

Select the correct SP for your Tricycle

- 100% Made in Italy
- 100% Recyclable
- Low Carbon Footprint

- Customer Care: spare parts service, easy assembling, see on Italtrike's Youtube Channel.
- Totally rust free

eolo Customers Care. Italtrike introduce the eolo QR code

3502-3503-3504

Assembly

When the "eolo"™ arrives at your door; you will find instructions on how to put together the tricycle in a user-friendly manner. We have designed a QR code that will be personalized to be your bike and product, and by following the code with your smartphone you will find assembly videos on YouTube, making it easier to see how to assemble your tricycle.

Replacement parts

If throughout the life of your "eolo"™ tricycle, you encounter any problems or are in need of replacement parts, simply scan the QR code that you will find on the body of the tricycle. This code will lead you to the portal to which you can order replacement parts for your tricycle and see other helpful tips from clients. Since each code will be personalized to the product type, you won't even have to remember the product code or struggle to find the informational packet that arrives with the trike on delivery.

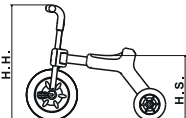

eolo, 100% recyclable materials.

"Toy scooter (for children with a body mass over 20 kg) shall have at least one braking system which shall operate on rear wheel."

Espresso

Italtrike espresso products are 100% made in Italy.

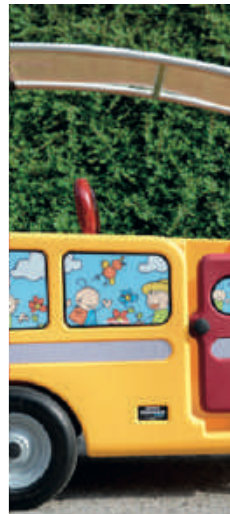

3 versions : 3 different types of travelling

espresso
classico

The **Classico** version is simple and economic. Suitable for schools that are located in flat areas.

- Economic
- Push Power
- Great reliability

espresso
sole

The **Sole** is most ecological. A solar panel on the roof provides a natural recharge of the batteries increasing its autonomy.

- Electric Motor
- Solar Panel
- Natural Charge
- Max Autonomy

espresso
elettrico

The **Elettrico** is equipped with a powerful electric motor powered by batteries which guarantee 3 working hours. The electric traction makes a totally easy and pleasant job for the user and saves the adult every little effort.

- Electric Motor
- 2 Gel Batteries
- 3 Hours Autonomy
- User Friendly

Kind und Jugend

"espresso" Technology & Service

Espresso is 100% design and made in Italy by Italtrike. Service, spare parts, assistance can be supplied to customers within a short time.

"espresso elettrico" Teachers

We have also considered the heavy job teachers have to do in pushing 6 children on a trip. Sometimes roads are not easy, they can be on a slope or downhill, if they stop for an emergency, it can be an heavy job.

"espresso elettrico" is the right solution. They can drive the stroller by one hand, and have the complete control of the vehicle without too much stress.

We hardly recommend teachers to study the espresso manual and to practice before using it with any children onboard.

"espresso" Take a seat

The inside of espresso has been designed in such a way as to give safety and comfort to all the passengers.

Each passenger is "inside" the vehicle; a locked door allows the entrance of passengers who can reach their seat without any help. has a 3 points safety belt, and a head rest.

To give more comfort, each seat also has a washable and padded cover.

"espresso" Roof

We have a big alloy pipe structure, roll bar, on which we can fix 2 different types of roof. A sun roof and an additional transparent wall around roof to simply slip over the roll bar structure, for a total protection from wind and rain showers.

"espresso" Accessories

A large range of accessories are available :

- Sun roof, wind & rain full body roof
 - Seat pads
 - Parking cover
 - Long power batteries 70A
 - Additional 6-12 months baby seat
- And other to come...

"espresso" Structure

The body is a one piece of plastic injected with special technology from an Italian leading company in this field. It gives rigidity, durability of the product. It reflects the same constructive concept of today's body cars.

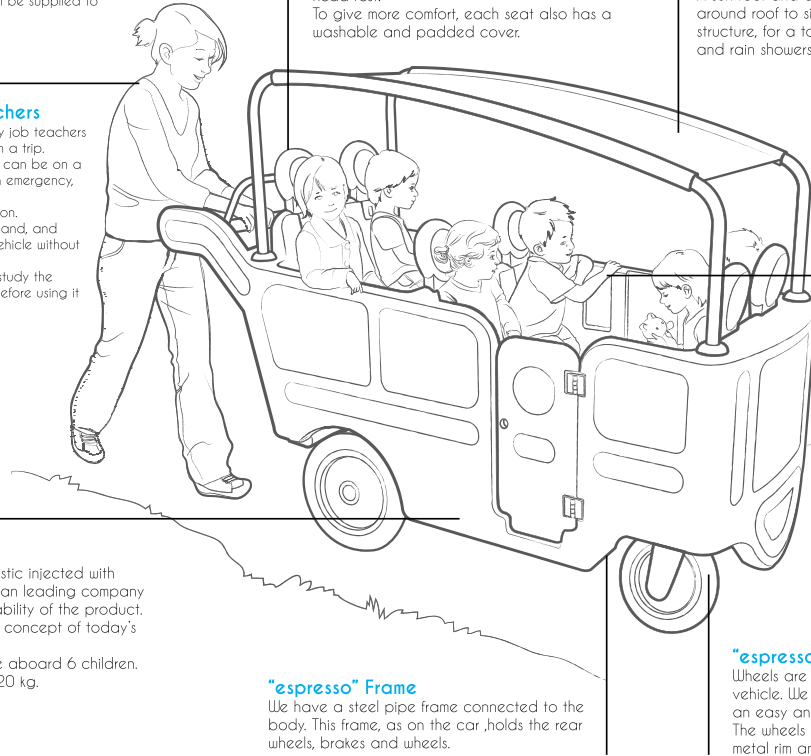

6 seated stroller, means to have aboard 6 children. "espresso" has a max load of 120 kg.

"espresso" Frame

We have a steel pipe frame connected to the body. This frame, as on the car, holds the rear wheels, brakes and wheels.

"espresso" Wheels

Wheels are very important on this kind of vehicle. We have selected big size wheels for an easy and comfortable ride. The wheels have high quality ball bearings, metal rim and high density tyres.

Espresso

Safety has been studied in every details in order to provide you the safest journey.

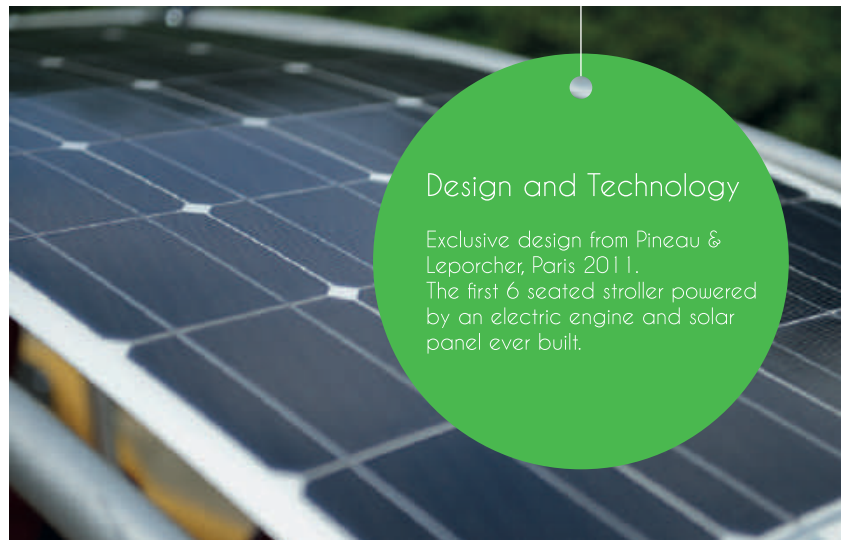

6 seats Safety First Comfort

To transport 6 children for a ride out in the countryside or in the city is not always an easy task. espresso is the solution by Italtrike. A sturdy and solid structure that protects the children while seated in their comfortable padded seats and seats belts and head rests.

Espresso illustrates the dedication on finding the perfect item that applies all the European safety standards.

The big dimension soft and solid puncture-proof wheels allows a smooth and constant utilisation in every type of roads. Now you just need to interact with the children.

Design and Technology

Exclusive design from Pineau & Leporcher, Paris 2011.
The first 6 seated stroller powered by an electric engine and solar panel ever built.

Create personalized graphics for your espresso !

The six seated stroller espresso is proposed in two versions:
 Base
 Granturismo (GT)

On the GT version you are able to customized your espresso with the aluminium Roll-bar, sun canopy, Every espresso can be personalized with the sided panels applying special graphics. More options can be applied to complete your equipment.

Roll-bar

Stickers

Seat-pads

Cover

We have made it easier to manovrate. Now entertain children.

Very practical for children and for the adults. Manageable in every situations even the most difficult ones. Children get onboard through a sided door that only opens and closes from the outside. More options can be applied to complete your equipment.

espresso is 100% made in Italy

Espresso is "made in Italy". Italtrike provides services of spare parts and technical assistance.

Choose your own colour

Cappuccino

Espresso

Comfort, we know how to do it !

Wheels

espresso wheels are soft and solid puncture-proof; their big dimension allows a smooth utilization in every type of road.

The electric version is easy to conduct; it makes easier for adults to bring kids uphill, downhill or even off road while children are comfortably seat on the espresso.

Padded comfortable washable seats, seat belts and headrests guarantees safety and comfort.

Easy to control even in difficult situations.

is our favourite number.

Children get in by themselves. They sit in their place, fasten their seat belts and are ready to go.

Difficult to feel better.
espresso elettrico

First class travel.
espresso elettrico

A nice trip out of town with friends.
espresso classico

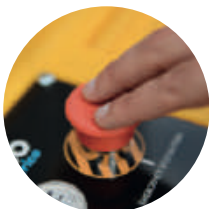

Safety, we travel safe !

Inside the six seats stroller children will be able to really enjoy their journey in total safety, thanks to its comfortable internal cockpit structure.

Control and safety commands are transmitted to the stroller through a throttle that allows to speed up and break down naturally. Every espresso version is equipped with the breaking system that guarantees safety in every conditions.

Once you release your hand from the throttle the stroller will immediately stop.

Every seat has a headrest and a 3 points safety belt.

The entrance door can be only opened from the outside.

Personalize your own Espresso:

Go to "www.espresso.italtrike.com" and built your own espresso.

In case of rain and wind the cover can easily be fixed on the roll-bar. The frontal and rear windows guarantees good air circulation.

Alutrike

ALUTRIKE is the only professional tricycle on the market. Italtrike has introduced the intensive knowledge and experience from the professional bicycles manufacturing in this line of tricycles.

Lightness, strongness, rust free made this products the best tricycle on the road !

Why alutrike

Aluminum is Light !

Compared to similar sized steel tricycles, Alutrike® is 30-35% lighter. This enables children to steer the tricycles easily and provides a more comfortable ride.

Aluminum is Strong !

New Aluminum have been developed providing greater level of strength. Additionally by creating Alutrike®, Italtrike has designed an exclusive aluminum extruded profile for its tricycle frames. The parts are hand welded by skilled and highly experienced craftsmen.

Aluminum Does Not Rust !

Painted products can be scratched and get rusted. Alutrike® products will be rust free forever. The perfect collection for areas by the sea.

Pilot line

Pilot Series Registered Community design n° 000496765-000 - Copyright: Pineau 2006

The Pilot Series is Italtrike the most comprehensive line. Smaller size tricycles in the Pilot 100 Serie are the perfect fit for toddlers aged 1-2 years, while preschoolers graduate, age 2-4, to the standard sized Pilot 200 Serie, and finally Pilot 300 Serie for Girls and Boys age 4-6 years.

This new commercial tricycles line has a distinctive European feel that enable to select the tricycle that best fits a child's development stage. These high quality tricycles offer all the features required to meet the high demand of child care setting. Commercial grade steel, durable finishes, outstanding workmanship and a great design which eliminates any possible pinch point.

Replacement parts are readily available. Pilot Tricycles are manufactured in Italy. Frame and forks have 5 years warranty.

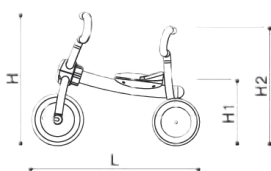

Pilot line 100

Pilot 100 - Blue Trikes

Between 1 and 2 years, children start learning functions and new body movements. It is important they start their activity with a tricycle designed for them. At the beginning they start moving the tricycle just by using their feet pushing on the ground, later they start pedalling. Pilot 100 is the line dedicated to beginners age 1 to 2 years old. A good start in absolute safety and comfort.

Pilot line 200

Pilot 200 - Orange Tricycles

Pilot 200 is the tricycles line designed for children from 2 to 4 years old. At this age, kids are more confident with their own capabilities, and they need more appropriated vehicles for their rides. They deserve a tricycle to ride alone and discover the freedom, a tricycle for 2 to ride a friend around and a 2 wheels scooter to improve equilibrium and their fun.

Features

- Easy access
- Vertical and horizontal regulation of the seat
- Banana foam seat
- Padded backrest with containment chest belt
- Compass adjusting system of the handlebar
- Compass adjusting system of the handlebar
- Removable support of the lower limbs
- Push handlebar with steering system of the front wheel
- Easy packing system for car loading
- PU puncture-proof tyres

Comfort

ZERO offers a good comfort to the child and allows easy control by his assistant and a wide range of regulation.

Our working experience that brought us today to develop and produce a special line of tricycles dedicated to special children.

Zero is a tricycle that looks like a regular tricycle, Italtrike produce and sell on regular basis. ZERO is a tricycle with ZERO differences, less those to facilitate the utilization to a larger number of children.

The challenge was too important and special to be developed by Italtrike only. We asked the help and collaboration of people with the correct competences and with the spirit to work together with us in this project.

ZERO has been developed thanks to the fantastic help of Mrs. Fosca Fornasei Senior Professor in Metodologia della Riabilitazione in Età evolutiva, at the Verona University, and President of the Association «Gioco Anchio», and of Matteo Mirandola, Mrs. Fornasei University Assistant. Thanks also to Lorenzo, our «test driver» and friend, and to his fantastic parents. But we will never stop to say thanks to all the parents, that in the future could help us in order to improve the tricycle. To make it a more and more valid instrument of play and support for their children.

ZERO will become a line of wheeled vehicles, designed with the purpose to help and facilitate the mobility of children from 2 to 12 years.

ZERO is not a therapeutic instrument, but it is part of the «playtherapy» philosophy. Inclusive products that allow children, with special needs, to gain the «right to play».

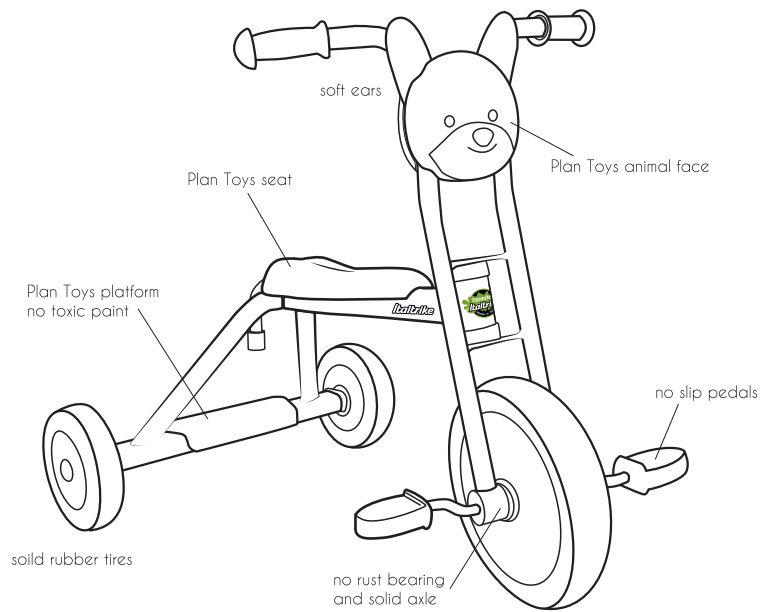

Forester

The Italtrike Forester Tricycles Line

Step on a Forester tricycle and you are immediately transported into the forest.

You will find lots of happy and nice friends to play with a Fox, a Rabbit, a Baby Wolf, Deer, a Bear and a Black Wolf...

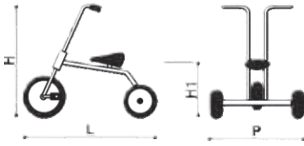

The traditional sturdiness and quality of Italtrike tricycles combined with a new *eco-friendly* material from Plan Toys, to enter together in the fantastic world of mother nature.

Village Italtrike

Linea Village

Village is Italtrike solution to teach the fundamental rules of road safety to children.

The DVD tutorial makes it simple and fun !

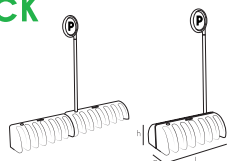

Children are therefore given the opportunity to put into practice what they have learned in the classroom.

The equipment supplied includes the official road signs, working traffic lights (which children can operate themselves), rubber zebra crossing carpets and parking rack.

La Cosa

little but makes big things

La cosa is the **first ride-on** which lets the little ones move freely around the house and the kindergarten. Children can easily and intuitively move around, **experiencing different balance sensations** and new motor skills.

It gives the child a sense of freedom, joy, happiness and a great will to move!

La cosa has been conceived and designed **to learn how to coordinate movements while seated.**

Children learn in **complete safety to steer left and right with body movements, using their feet and legs to push and stop.**

Made of robust, safe and sustainable materials.

La cosa is a toy that makes both children and parents happy.

The meaning of its name? with a bit of imagination this ride-on can be whatever you want it to be: a school bus, an ambulance, a fire truck, a police car, a mouse, a crocodile, or even a ladybug. La cosa supports children's imagination to launch themselves into many adventures in complete autonomy.

Get ready to fall in love with it!

la cosa:
FEATURES

SECURITY

COMPLIANT WITH INTERNATIONAL SAFETY REGULATIONS.

ITALTRIKE "SAFETY-FIRST" SECURITY SYSTEMS

LA COSA IS EQUIPPED WITH SECURITY SYSTEMS AS THE ROLLOVER PROTECTION SYSTEM THAT FURTHER INCREASES CHILDREN'S SAFETY.

DESIGN

ICONIC AND ATTRACTIVE DESIGN WITH SINUOUS AND MODERN LINES. CREATED IN COLLABORATION WITH THE PINEAU&LEPORCHES STUDIO IN PARIS.

SMART

LA COSA IS DELIVERED ALMOST ASSEMBLED, A CLICK IN THE HANDLEBARS AND IT IS READY TO RIDE. IT REQUIRES NO MAINTENANCE BUT ONLY OCCASIONAL CLEANING.

LIGHTWEIGHT AND STACKABLE

IT TAKES UP VERY LITTLE SPACE. YOU CAN PILE ONE ON TOP OF THE OTHER PERFECT FOR HOME USE AND KINDERGARTENS.

CUSTOMER SERVICE

PRODUCT CARE INFO AND SPARE PARTS ALWAYS AVAILABLE. BUILT TO LAST.

ITALTRIKE "BRAVO BOX"

100% PAPER FIBER PACKAGING, ZERO ONE-USE PLASTIC.

REGISTERED DESIGN

YOU WILL FALL IN LOVE WITH IT

Indoor use only

CRASH-PROOF PLASTIC, ROUNDED SHAPES

TO AVOID CRAWLING ON WALLS; ITS ROUNDED SHAPES DO NOT DAMAGE FURNITURE AND DOORS.

SAFETY FIRST: ANTI-TIP SYSTEM

EQUIPPED WITH A REAR AND FRONT ANTI-TIP SYSTEM.

SMALL COMPARTMENT UNDER THE SADDLE

TO SECRETLY STORE AND CARRY TOYS AND MANY OTHER THINGS.

SUPPORT HANDLEBARS

TO BE SAFE IN THE SADDLE, IT MAKES THE STEERING INTUITIVE.

RUBBER-COATED WHEELS

TO ADAPT TO ANY SURFACE WITHOUT LEAVING MARKS SUITABLE ON WOODEN FLOORS. SILENT.

FRONT WHEELS TURN 360°

TO BE ABLE TO TURN AND RIDE EVEN IN VERY SMALL PLACES.

SUSTAINABLE

BODY STRUCTURE IN MAPEL RECYCLABLE PLASTIC MADE UP WITH AT LEAST 30% OF RECYCLED POLYMERS.

LIGHT AND COMPACT

STACKABLE UP TO 4 PRODUCTS. SPACE-SAVING, PERFECT FOR HOME USE AND KINDERGARTENS.

La Cosa Animals

Grow up on the move!

Uncompromising design simplicity, perfect proportions for the best functionality, years of carefree rides : that's «la cosa».

Super compact, super handy, several la cosa can be stacked together, which makes it even more suitable for small urban spaces.

Since its launch it is a worldwide success, this is the original, often copied but never equaled ...

Many nice animals to accompany kids in every step of their growth; from the ladybug to the mouse, from the crocodile to the lion and even a tender panda.

La Cosa Vehicles

Why la cosa?

It's a Trainer for Kids

Kids learn equilibrium, stability and how to push and stop with legs. Our objective was to let kids move on wheels safely even indoor.

Resistant

La Cosa has been tested and is resistant to 50 Kilos. This Italian product stands out for its great functionality, durability and a timeless design. Its longevity is the core of the product's contribution to sustainable development.

Silent and clean indoor

Smooth, maintenance-free, highly reliable thanks to special ABEC industry standard ball bearings and completely silent for the solid rubber wheels. The top quality rubber wheels guarantee total silence and do not leave any marks or scratch on the floor.

Funny

The two front wheels have full 360° rotation, while the two rear wheels are fixed, so let kids move and enjoy riding La Cosa 1 even in very small rooms. Moreover in the storage compartment they can take their favourite treasures and small toys with them.

La Cosa 2

learn & Ride!

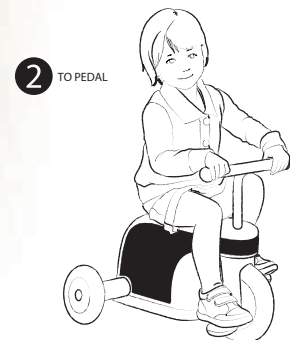

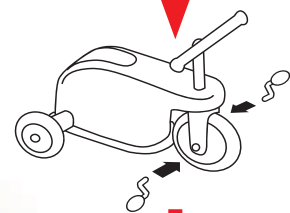

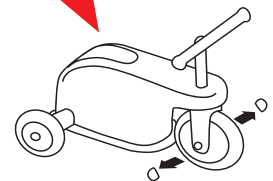

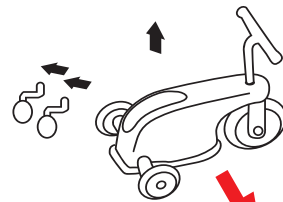

A great product for the very first ride. Easy to push and roll by the kid to develop his/her gross motor skills. Pedals can be easily fixed on the front wheel to be quickly used by the kid.

The perfect tricycle to use indoor, in the safest place in the world, your own home. Children like to move, children like to ride, children like La Cosa!

It's easy! in 3 steps, from a ride on into a tricycle

Ride-on

Tricycle

We will grow up together!

Eolo, 100% recyclable tricycle

Recyclable materials

Tricycle designed and built the EOLO tricycles in observance of current recycling and eco-sustainable criteria.

At the end of its life the tricycle can easily be completely broken down into its various parts for recycling. The types of materials used on the tricycle are listed below, with the relevant recycling codes.

Code	Type of material	Code	Type of material
♻️	Plastic	♻️	Iron and steel

The materials must be disposed of in accordance with the local regulations in force on waste collection.

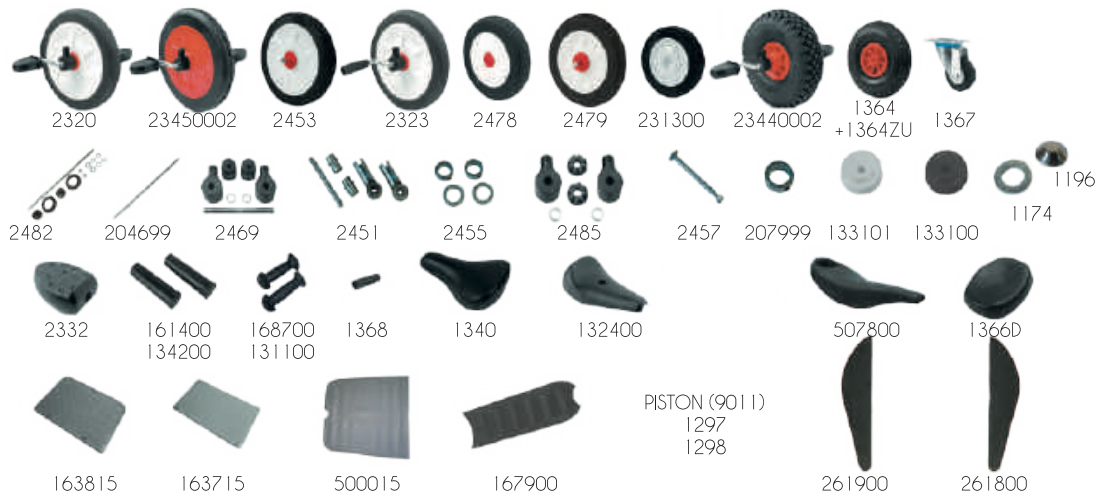

Disposing of packaging

All the packaging can be recycled. The types of materials used in the packaging are listed below, with the relevant recycling codes.

Code	Type of material
♻️	Large and small cardboard
♻️	Large and small boxes

The materials must be disposed of in accordance with local regulations in force on waste collection.

READY FOR TOMORROW!

FOR CHILDREN, MOVEMENT MEANS WELL-BEING, GROWTH, MOTOR AND INTELLECTUAL DEVELOPMENT. THANKS TO ACTIVITIES AND PLAYING, CHILDREN LEARN AND GROW UP. THEY BECOME AWARE OF THEIR OWN BODY IN RELATION TO SPACE AND THEIR PLAYMATES.

OUR MISSION? TO PUT CHILDREN'S WELL-BEING AT THE HEART OF OUR PRODUCTS.

TO INNOVATE THE MARKET FOR CHILDREN'S RIDE-ONS, TRICYCLES AND WHEELED-TOYS THROUGH PRODUCTS OF THE HIGHEST QUALITY, 100% MADE IN ITALY, PRODUCED RESPECTING PEOPLE AND ENVIRONMENT, WITH A UNIQUE DESIGN CONCEIVED TO LAST. TO ENSURE THE DEVELOPMENT, GROWTH AND JOY OF OUR KIDS.
